Practical Title: Admin Dashboard with Role-Based Access Control, Dynamic Menu, and Audit Log

Problem Definition: Develop an admin dashboard that displays user statistics, student count, event count and latest registrations. Restrict access to admin users only and show dynamic menu options based on role.

Theory :

1. Are dashboard values loaded dynamically from the database?

Yes. The user count, student count and event count are taken using SQL aggregation queries such as SELECT COUNT(*). The latest registrations are taken using a JOIN of the registrations, students and events tables with ORDER BY and LIMIT. No value is written manually in the code.

2. Is access restricted to admin users?

Yes. At the top of the dashboard page, the session is checked for a logged-in user and the role must be admin. If not, the user is redirected to the login page or shown an access denied message.

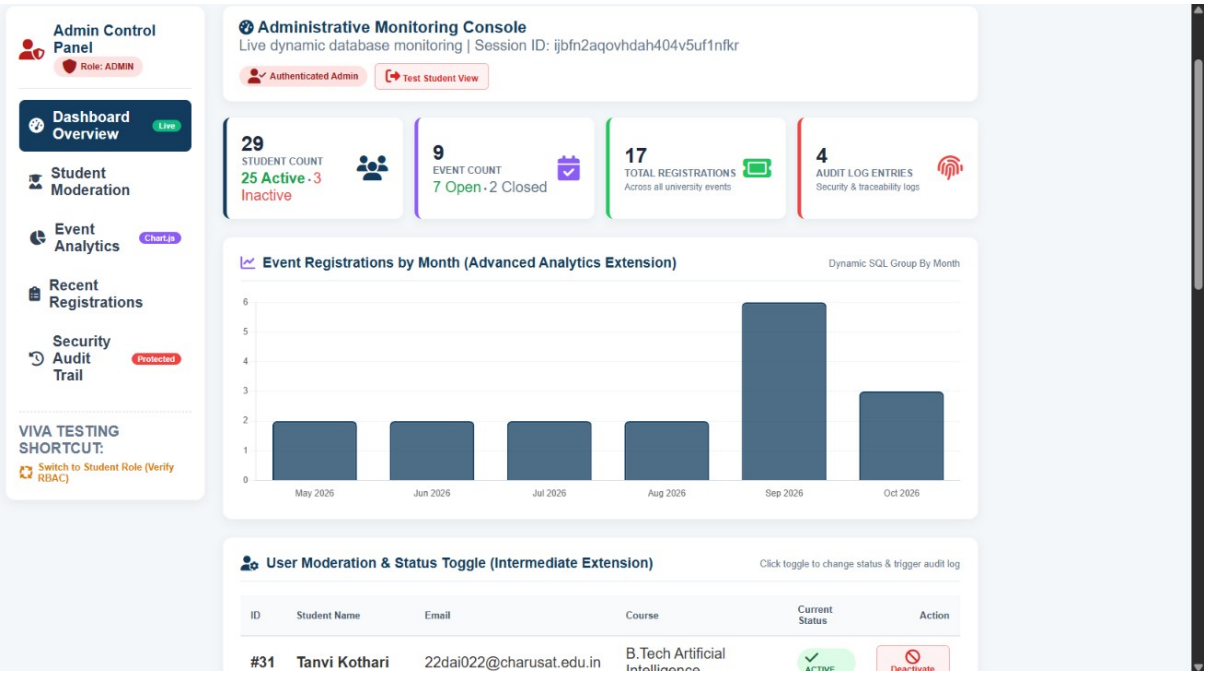

3. Are role-based menus working?

Yes. The menu is created in PHP according to the role saved in the session. Admin users see options such as Dashboard, Manage Students, Manage Events, Users and Audit Logs, while student users see only options such as Profile, Events and My Registrations.

4. Are important admin actions recorded in audit_logs?

Yes. An audit_logs table stores the user id, action, details, IP address and date-time. A common function is called after important actions such as login, adding, editing or deleting students and events, and changing user status, so every action can be traced.

Implementation/ Output/Result

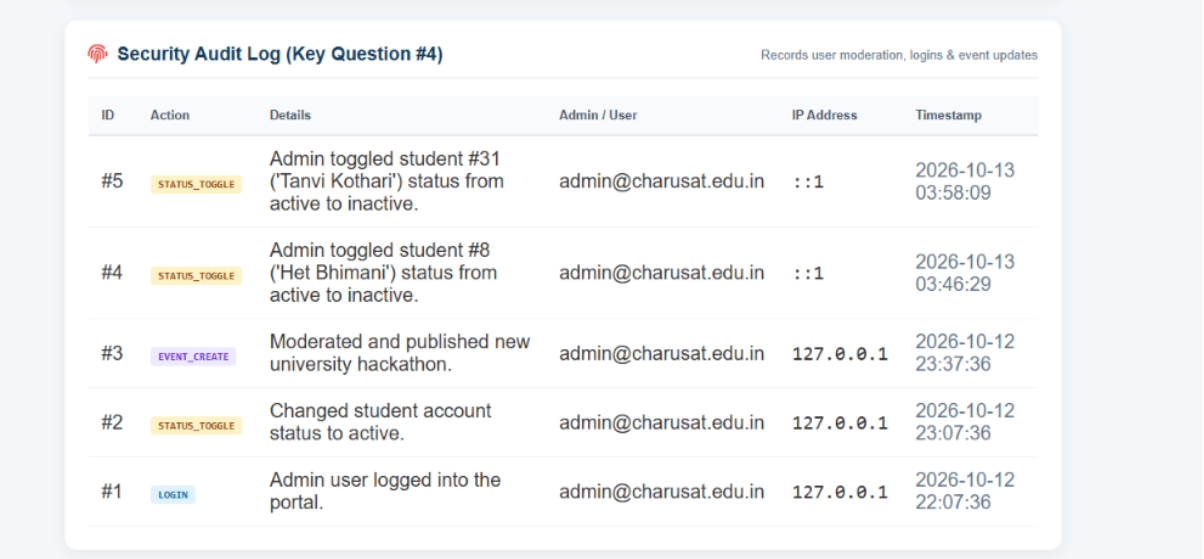

User Moderation & Status Toggle (Intermediate Extension)

Click toggle to change status & trigger audit log

ID	Student Name	Email	Course	Current Status	Action
#31	Tanvi Kothari	22dai022@charusat.edu.in	B.Tech Artificial Intelligence	INACTIVE	Activate
#30	Siddharth Prajapati	22dcs021@charusat.edu.in	B.Tech Computer Science	ACTIVE	Deactivate
#29	Riya Desai	22dce020@charusat.edu.in	B.Tech Computer Engineering	ACTIVE	Deactivate
#28	Rohan Raval	22dce019@charusat.edu.in	B.Tech Computer Engineering	ACTIVE	Deactivate
#27	Prachi Shah	22dit018@charusat.edu.in	B.Tech Information Technology	ACTIVE	Deactivate
#26	Omkar Bhatt	22dit017@charusat.edu.in	B.Tech Information Technology	ACTIVE	Deactivate

(After active to Deactive)

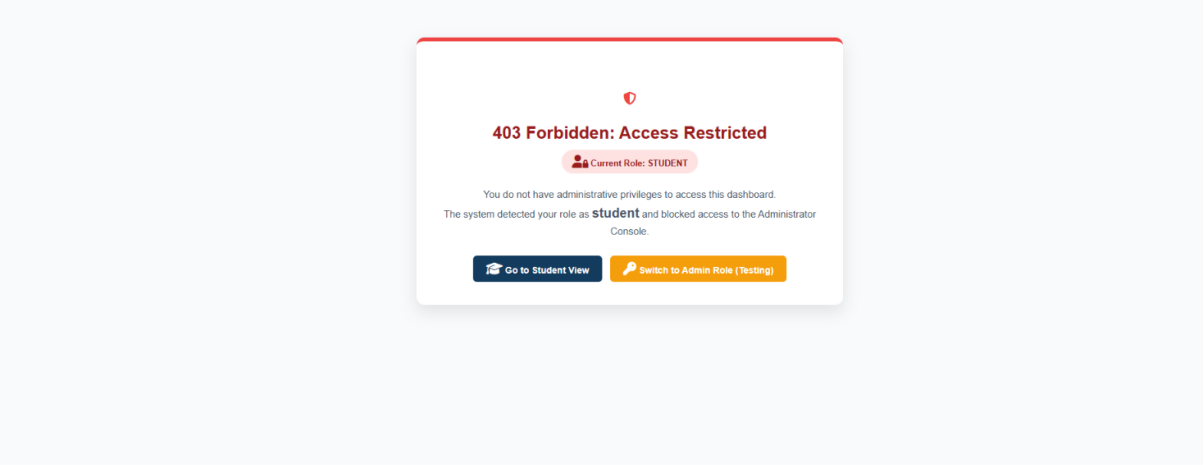

Security Audit Log (Key Question #4)

Records user moderation, logins & event updates

ID	Action	Details	Admin / User	IP Address	Timestamp
#5	STATUS_TOGGLE	Admin toggled student #31 ('Tanvi Kothari') status from active to inactive.	admin@charusat.edu.in	::1	2026-10-13 03:58:09
#4	STATUS_TOGGLE	Admin toggled student #8 ('Het Bhimani') status from active to inactive.	admin@charusat.edu.in	::1	2026-10-13 03:46:29
#3	EVENT_CREATE	Moderated and published new university hackathon.	admin@charusat.edu.in	127.0.0.1	2026-10-12 23:37:36
#2	STATUS_TOGGLE	Changed student account status to active.	admin@charusat.edu.in	127.0.0.1	2026-10-12 23:07:36
#1	LOGIN	Admin user logged into the portal.	admin@charusat.edu.in	127.0.0.1	2026-10-12 22:07:36

Learning Outcomes:

- Build an admin dashboard with data loaded dynamically from MySQL.
- Implement role-based access control (RBAC) for pages.
- Create dynamic menus based on the user role.
- Record important admin actions using audit logs for traceability.
